

Firm Profile

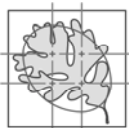

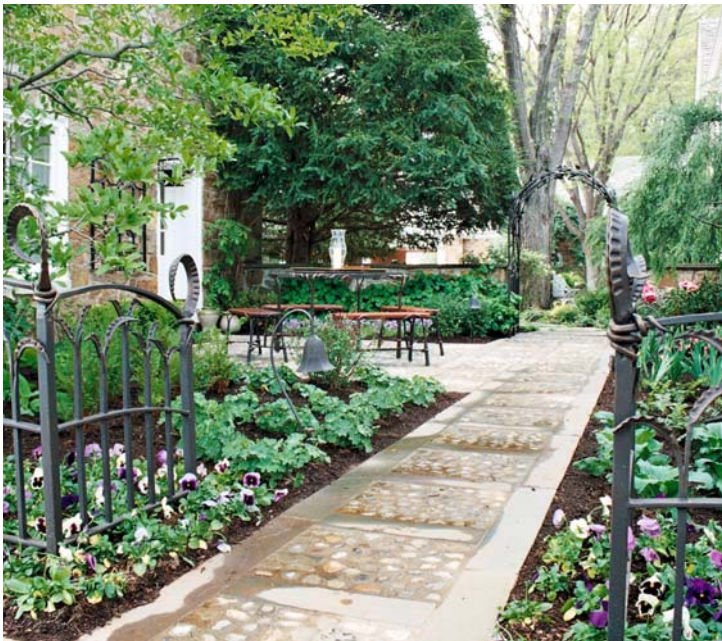

The award-winning firm of Davies Associates Landscape Architects, LLC (DALA), is an experienced, energetic landscape architecture firm centrally located in Parsippany, NJ. Since 1994, the firm has provided the finest planning, design, and construction administration services available to its clients in New Jersey and beyond. Our team of highly qualified landscape architects and planners combines creative design, technical expertise, and sustainable practices to create beautiful outdoor places that also provide a net benefit to the surrounding environment. Our work includes:

- parks and recreation facilities
- school, college, and corporate campuses
- healthcare and senior living facilities
- downtown streetscapes
- private residences

DALA engages its clients in a dialogue about their unique needs and desires. We clarify ideas and priorities and then develop specific design solutions in response to our clients' needs. Each site is assessed for its unique environmental qualities and limitations, natural attributes, and cultural or historic significance, which then inform the design process. Our goal is to create useful and beautiful places by using high-quality materials, rich textures, seasonal color, and beautiful details. We collaborate with engineers, architects, and contractors to translate our site concepts into exceptional landscapes.

DALA is at the forefront of green design, committed to incorporating sustainable site planning strategies wherever possible. Our Leadership in Energy and Environmental Design (LEED)-accredited professionals can facilitate LEED certification on projects of any size or scope.
