

A Residence in Bernardsville Mountain

Bernardsville, New Jersey

A Landscape Master Plan was prepared for the property. Drainage and grading problems were corrected around the house and conceptual designs for site work were developed. A path system was planned to traverse the length of the property and landscape views were analyzed.

Planting plans were prepared for a parking court and for around the main house and refurbished pool. The planting design includes reorganized existing beds, the creation of new beds and includes shade trees, flowering trees, evergreen trees, flowering shrubs, and perennials.
