

Vineland Veteran's Memorial Home

Vineland, New Jersey

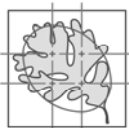

Vineland Veterans Memorial Home, a 27 acre Veterans Administration complex in Vineland, NJ provides skilled nursing care and housing for retired and disabled veterans. The entire campus underwent a six year renovation which included the removal of all but one of the existing buildings, and the construction of a brand new state-of-the-art care facility designed by NK Architects, LLC.

Davies Associates Landscape Architects, LLC (DALA), prepared a master plan of the entire campus and developed detailed site designs for numerous areas within the complex including a park-like setting appropriate for picnicking, viewing and strolling, therapeutic gardening areas for veterans, and outdoor terraces for sitting and socializing. A large bi-level courtyard in the center of the building includes a sculptural waterfall, trees for shade, benches, tables, and lush plantings which add seasonal color.

The grounds also include a memorial garden featuring a spiral walk along which are displayed monuments that were once scattered across the campus. All paths, sitting areas, and views are defined by plantings and custom bollards.
