

Dewy Meadow Village

Bernards Township, New Jersey

The landscape architects developed a master plan site and landscape design for a 9-acre "new urbanism" village center/shopping area centered around a town green with a gazebo and a clock tower in a center park-like setting. The firm's work included the layout of all the site's features, a soccer field, the design of a pond, and the clear organization of the site, with strong rows of tree plantings and colorful plantings of shrubs around the shops and stores. Special paving patterns were developed for the site and a cohesive collection of site furniture and amenities were chosen to create a "Landscape Vocabulary". The town green was designed to provide a space for public gatherings during special occasions.
