

Fairleigh Dickinson University

Teaneck/Hackensack, New Jersey

The landscape architects, working closely with the University Facilities staff, developed a Campus Landscape Master Plan for the North end of the campus. The plan includes a new pathway system and landscape design, as well as the relocation of some small parking areas and paved driveways from the heart of the campus to the periphery. The central spine of the campus is given back to the students as a green pedestrian space. The plan includes stone walls, brick lined paths, plazas, seating, open lawns, sculpture, and significant plantings.
