

A Private Residence

Hartley Farms, Harding Township, New Jersey

The award-winning design of Davies Associates Landscape Architects took advantage of a natural slope on the land to create this private backyard. A formal central lawn and patio is framed by stone walls, a pergola, and plantings. A hedgerow of native plant materials, a rustic three-rail fence and a permanent meadow surround the rear yard and provide a buffer from the adjoining properties. The upper bluestone terrace and perennial garden leads to a wide stone staircase, which leads down to the main patio that is complete with a stone fire pit and a traditional kitchen herb garden. The pergola surrounds the spa area and defines the side of the yard, while perennial beds surround the open lawn in the backyard and provide seasonal colors and textures. This design has created a wonderful outdoor living space for this lovely estate and has also become a healthy, sustainable asset to this community's environment.
