

## Mansion in May 2010 — Fawn Hill

Harding Township, New Jersey

The design of *The Blacksmith's Cottage* was inspired by the iconic metal Fawn Hill weather-vane, which sits atop the porte cochere opposite the cottage. The simple beauty and character of our design was inspired by Longfellow's poem. *The Blacksmith's Cottage* is a collaborative effort which brings to light the talents of landscape architects, masons, landscape contractors, and of course, a blacksmith. The cottage site is enhanced by a richly textured patio and walkway which complements the stone cottage and walls. The cottage is adorned with seasonal plantings, accented by earthenware pots, and framed by hand forged and richly sculptural wrought metal furnishings. The simple beauty and usefulness of the garden evokes an earlier time.
