

A Private Residence

Harding, New Jersey

The clients wished to develop this 3-acre site as a home for their family, a recreation area for their children, and a place to entertain guests by incorporating a pool, patio, and open lawn areas. The site was previously an open meadow and zoning restrictions limited the area of development to a small portion in the center of the lot. The pool and patio are accented with stone walls and wide stone stairs to provide areas for conversation and to facilitate pleasant grade changes. A raised terrace in the rear is enclosed by a trellis, providing an area for outdoor dining. An open front yard offers a recreation area for the children, while a large palette of perennials and flowering shrubs provide seasonal color.
