

# St. Joseph's Regional Medical Center Plaza

Paterson, New Jersey

St. Joseph's Medical Center asked Davies Associates Landscape Architects to design a plaza in front of this urban hospital's entrance. The site design provides seating areas, gardens, lighting and a central plaza with chess and checker tables to accommodate hospital patients, staff and local neighborhood residents. Plantings were selected to give seasonal colors in beds that surround the sitting areas and a colorful entrance for the hospital, providing much needed green relief for this urban neighborhood.
