

The Flats at 505

New York, New York

On an urban rooftop in midtown Manhattan, Davies Associates Landscape Architects designed a green roof garden for the enjoyment of the 505 residents. A synthetic lawn, trellis, wood decks and pedestal pavers were used to provide a variety of outdoor spaces for sitting, dining or exercising. Outdoor lighting provides a comfortable evening ambiance on the decks, and the plantings provide a warm welcome for these homes in the city. An exercise room overlooks the rooftop garden and bamboo hedges define private outdoor courtyards. The upper terrace offers a spectacular view of midtown Manhattan.
